

### **Declaration of support for an effective climate agreement**

"Over the years, ACCIONA has never wavered in its staunch commitment to lead from the cutting-edge and innovation in the transition towards sustainable development. Our business model fosters the creation of sustainable infrastructure, the definition of a new energy model and universal access to water.

The current economic downturn makes this commitment even more necessary. It is now all-important to completely overhaul the model of growth and consumption and to stem the damage being done to the environment, to avoid jeopardizing generations to come. That is the challenge facing us. We must step up measures now. Seal the Deal!"

José Manuel Entrecanales Domecq – President & CEO - ACCIONA
