In accordance with Regulation 1606/2002 of the European Parliament and of the Council of 19<sup>th</sup> July 2002, for each financial year starting on or after 1<sup>st</sup> January 2005, companies governed by the law of a Member State must prepare their consolidated accounts in conformity with the International Financial Reporting Standards (IFRS) adopted by the European Union if their securities are admitted to trading on a regulated market.

The ACCIONA Group's consolidated financial statements are presented in accordance with the International Financial Reporting Standards (IFRS) approved by the European Parliament to date. The financial statements were based on the individual accounts of ACCIONA, S.A. and its Group companies and they include the necessary adjustments and reclassifications to adapt them to IFRS.

ACCIONA reports in accordance with its corporate structure, which comprises three divisions:

 Energy includes the electric business encompassing the promotion of renewable generation plants, its construction, its O&M and the sale of the energy produced. All the electricity generated by Acciona Energía is renewable.

#### • Infrastructure:

- Construction includes construction, industrial and engineering activities as well as mainly transport and hospital concession activities
- Water includes the construction of desalination, water and wastewater treatment plants, as well as integral water services management from bulk water abstraction all the way to discharging treated wastewater to the environment. ACCIONA Agua also operates water concessions across the entire water cycle
- Services include the activities of facility services, airport handling, waste management and logistic services among others
- Other activities includes the businesses of Trasmediterránea, real estate, Bestinver, wineries and other businesses

On July 3<sup>rd</sup> 2016 Guidelines on Alternative Performance Measures (APM) published by ESMA came into force. This requires an explanation in the management report on how financial parameters or performance measures, that do not appear in the financial statements straight away, are calculated. To meet this guideline, the APM's used in this report by ACCIONA Group are listed and defined below including an explanation of why these APM are used:

**EBITDA:** it is defined as operating income before depreciation and amortization, that is, the operating result of the group. It is calculated by taking the following items of the consolidated income statement: "net revenue", "other revenues", "change in inventories of finished goods and work in progress", "cost of goods sold", "personnel expenses" and "other operating expenses".

**Net Debt:** it shows the Group's debt, in net terms, deducting cash and cash equivalents. It is calculated by taking the following items from the consolidated balance sheet: "non-current interest bearing borrowings", "current interest bearing borrowings", less "cash and cash equivalents" and "other current financial assets".

**Non-recourse debt:** it corresponds to debt that does not have corporate guarantees, and therefore its recourse is limited to the debtor's assets and cash flows.

**Recourse debt:** Debt with a corporate guarantee.

**Financial gearing:** it shows the relation between the Group's financial debt and its equity. It is calculated dividing "net debt" (calculated as explained above) by "equity".

**Backlog:** is defined as the pending production, that is to say, contractual amounts or customer orders after having deducted the amounts already accounted for as income in the income statement. It is calculated on the basis of orders and contracts awarded to the Group, deducting the realized portion that is accounted on "net revenue" and adding or subtracting "other variations" that correspond to forex adjustments, modifications to the initial contracts, and other changes to be made to the awarded backlog.

**Net Capex:** it is defined as the net change in the balance of property, plant & equipment, intangible, financial and real estate assets during the period, corrected by:

- Depreciation, amortization and impairment of assets during the period
- Results on non-current assets
- Forex fluctuations

When dealing with changes in the consolidation perimeter, net capex is defined as the net outflow/inflow of used/sourced resources in the purchase/sale of net assets.

Management uses this APMs to take financial or operational decisions as well as in the planning process. They are also used to evaluate the performance of the Group and its subsidiaries.

Management considers these APMs provide useful additional financial information to evaluate the performance of the Group and its subsidiaries as well as for decision-making by the users of the financial information.

#### 1. EXECUTIVE SUMMARY

#### **Key Highlights**

- ACCIONA generated EBITDA of €301 million during Q1 2017. This
  represents an increase of 8.5% vs. Q1 2016. This quarter has been
  characterized by a higher contribution from Infrastructure (+€33 million)
  that has more than offset the slight decrease in the Energy division (-€4
  million) and the lower contribution from Other Activities (-€5 million).
- Even though the Generation business improved its results, the Energy division as a whole saw a decline in EBITDA of 2.1% relatively to Q1 2016 mainly due to the lower contribution from the non-generation activities in the division (exit of ACCIONA Windpower from the consolidation perimeter in Q2 2016, and lower contribution from the EPC activity).
- The Generation business in Spain increased its EBITDA thanks to the higher regulated income following the recent periodic review and the higher level of wholesale electricity prices. These positive drivers were signficantly mitigated by the regulatory banding mechanism, forward sales, and lower production.
- International Generation business also suffered from lower generation volumes which led to declining EBITDA, although this was more than compensated by a higher contribution coming from the Generation business in Spain.
- The EBITDA of Infrastructure division increased across all its business lines, especially international Construction, that grew in both volumes and margins.
- In terms of Capital Expenditure, in Q1 2017 the group invested €272 million which compares with the €299 million invested in Q1 2016. The Infrastructure division capex includes the Geotech acquisition (€139 million). Net Investment Cashflow increased by €27 million to €319 million relative to Q1 2016.
- Debt increased to €5,498 million. This is mainly explained by higher working capital and capital expenditure during the quarter.
- On the other hand, financial expenses have decreased significantly, which evidences the consolidation of the Group's new funding model.
- In Q1 2017, the Infrastructure division was awarded new projects such as the construction of a new terminal for the International airport in Mexico City.

#### Revenues

| Revenues (Million Euro)   | Jan-Mar 16 | Jan-Mar 17 | Chg.(€m) | Chg.(%) |
|---------------------------|------------|------------|----------|---------|
| Energy                    | 573        | 463        | -109     | -19.1%  |
| Infrastructure            | 738        | 1,066      | 329      | 44.6%   |
| Construction              | 427        | 728        | 301      | 70.4%   |
| Water                     | 163        | 176        | 12       | 7.5%    |
| Service                   | 158        | 172        | 13       | 8.5%    |
| Consolidation Adjustments | -11        | -9         | 3        | 22.9%   |
| Other Activities          | 128        | 128        | 0        | 0.3%    |
| Consolidation Adjustments | -20        | -24        | -4       | 18.9%   |
| TOTAL Revenues            | 1,418      | 1,634      | 216      | 15.2%   |

Consolidated revenues increased by 15.2% to €1,634 million, mainly due to the combined effect of the following factors:

- The decline in Energy revenues (-19.1%) mainly as a result of the deconsolidation of AWP (wind turbine business) from 1<sup>st</sup> April 2016 which more than offset higher revenues coming from Generation.
- Increase in revenues in all Infrastructure business lines, particularly in Construction (+70.4%).
- Revenues from Other Activities remain flat (+0.3%).

#### **EBITDA**

| EBITDA (Million Euro)     | Jan-Mar 16 | % EBITDA | Jan-Mar 17 | % EBITDA | Chg.(€m) | Chg.(%) |

| Infrastructure            | 53         | 19%      | 86         | 29%      | 33       | 62.7%   |
| Construction              | 23         | 8%       | 50         | 16%      | 27       | 117.6%  |
| Water                     | 28         | 10%      | 32         | 11%      | 5        | 17.4%   |
| Service                   | 3          | 1%       | 4          | 1%       | 2        | 59.9%   |
| Consolidation Adjustments | 0          | n.m.     | 0          | 0%       | 0        | n.m.    |
| Other Activities          | 12         | 4%       | 7          | 2%       | -5       | -40.9%  |
| TOTAL EBITDA              | 277        | 100%     | 301        | 100%     | 24       | 8.5%    |
| Margin (%)                | 19.6%      |          | 18.4%      |          |          | -1.1pp  |

Note: EBITDA contributions calculated before consolidation adjustments.

EBITDA increased by 8.5% to €301 million. This was mainly due to the higher contribution of Infrastructure (62.7%) which comfortably compensated for the slight decrease in the Energy division (-2.1%) and the lower contribution from Other Activities (-40.9%).

#### **EBIT**

EBIT amounted to €146 million, 14.2% lower than in Q1 2016. This was mainly due to the accounting of Other Profit and Losses in Q1 2016 for a total amount of almost €42 million (ATLL capital gain and reversion of a Trasmediterránea-related provision).

### **Earnings Before Tax (EBT)**

| EBT (Million Euro) | Jan-Mar 16 | Jan-Mar 17 | Chg.(€m) | Chg.(%) |
|--------------------|------------|------------|----------|---------|
| Energy             | 38         | 70         | 32       | 83.0%   |
| Infrastructure     | 13         | 22         | 8        | 62.2%   |
| Construction       | 8          | 13         | 5        | 61.0%   |
| Water              | 5          | 9          | 4        | 84.9%   |
| Service            | 0          | 0          | -1       | -135.5% |
| Other Activities   | -6         | 7          | 13       | 206.5%  |
| Ordinary EBT       | 45         | 98         | 53       | 116.5%  |
| Extraordinaries    | 26         | 0          | -26      | n.m.    |
| TOTAL EBT          | 71         | 98         | 26       | 37.0%   |
| Margin (%)         | 5.0%       | 6.0%       |          | +1.0pp  |

Ordinary EBT increased by 116.5% to €98 million boosted not only by the increase EBITDA but also by lower financial expenses and the increase of the contribution from assets accounted under the equity method (which mainly correspond to the Energy division).

Since there were no extraordinary results in Q1 2017, the total EBT and ordinary EBT are equivalent, with an increase of 37.0% vs. Q1 2016

#### **Attributable Net Profit**

Attributable net profit amounted to €60 million, 20.8% higher than in Q1 2016.

Net financial debt as of March 2017 totalled €5,498 million, 7.1% above December 2016 levels. This variation in debt is mainly due to the combination of the following factors:

- The operating cashflow amounted to -€16 million, mainly due to the negative contribution from working capital, as was the case in the same period 2016. As a positive factor, it is worth noting the reduction in financial expenses fell to €60 million (-39.4% vs Q12016)
- The intense investment activity of the period, with a Net Investment Cashflow of -€319 million, reflecting mainly the investments in the Infrastructures division (mainly Geotech's acquisition) and Energy

Financial gearing has evolved as follows:

Gross capital expenditure across ACCIONA's divisions in Q1 2017 amounted to €272 million.

Infrastructure represents the highest investment figure with  $\[ \]$ 176 million – mainly related to the acquisition of Geotech ( $\[ \]$ 139 million). This was followed by Energy with  $\[ \]$ 95 million, mainly related to the completion of the El Romero PV facility in Chile and the ongoing construction of new capacity in India.

In terms of divestments, the group sold a commercial property belonging to the Real Estate division for €12 million. This asset was classified in FY 2016 Balance Sheet as an asset held for sale.

As a result, net capital expenditure increased to €260 million. In terms of cash outflows, the Net Investment Cashflow amounted to €319 million.

ACCIONA Energy revenues decreased by 19.1% to €463 million. EBITDA fell by 2.1% to €208 million. EBT amounted €70 million vs. €38 million in Q1 2016.

Generation EBITDA increased by 5.6% to €226 million, thanks to the higher contribution from the Spanish business, more than offsetting the decline in International Generation which saw lower production levels.

The Generation business in Spain increased its EBITDA thanks to higher regulated income following the recent periodic review, as well as the higher level of power prices ( ${\in}55.6$ /MWh vs  ${\in}30.7$ /MWh in Q1 2016). However, these factors were significantly mitigated by the regulatory band mechanism, forward sales, and the lower production.

EBITDA contribution coming from Non Generation activities decreased by €19 million mainly due to AWP deconsolidation (contributed €7 million in Q1 2016) and the reduction in the EPC business.

In Q1 2017, consolidated installed capacity increased by 323MW vs. Q1 2016, mainly due to the commissioning of 228MW solar PV in Chile, 51MW wind in India, 93MW wind in EEUU. The 48MW located in Greece were written off in H1 2016.

At an operational level, consolidated production amounted up to 4,609GWh, 8.5% lower than in Q1 2016 due to lower wind output in both Spain and International which was not compensated by the increase in solar photovoltaic production.

The Other Activities division, which includes Trasmediterránea, Real Estate, Bestinver, Wineries and others, reported revenues for Q1 2017 of €128 million, in line with the same period last year (+0.3%).

EBITDA decreased to €7 million (-40.9%), mainly explained by Trasmediterránea results and despite the increase in contribution of Bestinver.

#### Trasmediterránea:

Trasmediterránea EBITDA fell to -€6 million, due to the decrease in traffic levels and vehicles during Q1 2017 (mainly due to the Easter holidays that took place in Q2 2017 as opposed to Q1 during last year), as well as the higher fuel costs as a result of higher oil prices.

The results of the 2016 annual review confirm that ACCIONA is a component of the Dow Jones Sustainability World Index (DJSI World) for the tenth consecutive year. It has been included in the DJSI Europe, as well. These indexes are composed of those companies deemed most advanced in economic, social and environmental terms.

Following a new half-year assessment, ACCIONA continues to rank on the FTSE4Good Index Series. Companies in the FTSE4Good Index Series have met stringent social and environmental criteria, and are positioned to capitalise on the benefits of responsible business practice.

#### **MSCI Global Climate Index**

ACCIONA is a constituent of the MSCI Global Climate Index, which includes companies that are leaders in mitigating immediate and long-term factors that contribute to climate change.

ACCIONA has been included in the CDP 2016 Climate A List and CDP 2016 Water A List, comprised of companies that demonstrate leadership through action to combat climate change and sustainable water management practices, respectively. It has also been listed in the CDP Supplier Climate A List.

# STOXX Global Climate Change Leaders Index

ACCIONA is currently a component of the STOXX Global Climate Change Leaders Index. This is the first ever index based on CDP's global Climate A List and includes low carbon leaders who are publicly committed to reducing their carbon footprint.

# 9.2. Sustainability events during the period:

- ACCIONA has been awarded the "RobecoSAM Silver Class 2017" within the Electric Utilities sector in The Sustainability Yearbook 2017 produced by RobecoSAM. These distinctions are given to companies with best sustainability practices at sector level.
- ACCIONA is a carbon neutral company. It has offset those 2016 CO<sub>2</sub> emissions that have not been reduced, through the cancellation of certified carbon credits (CERs, Certified Emission Reductions), emitted by the United Nations Framework Convention on Climate Change (UNFCCC).
